

"The StyleCAD system means we can email patterns to our manufacturer and alter patterns with **ease**. It is **absolutely brilliant**. We had thought about purchasing this machinery before but weren't prepared to take the risk. The StyleCAD forced us to move from cutting patterns in the traditional way by hand, and as a result we've been able to make considerable savings because **wastage is reduced**.

It's been one of the best business decisions we've made.
Our business is now much more productive and competitive."
